

NEW! from Lutron®

AuroRa®

wireless lighting control

control the lights from the car, patio and bedside

Create a safe path of light to,
through and around the home

Wall Dimmer

Contractor Benefits:

- maximize profits** – entire system installs in under 30 minutes
- pre-programmed** – works right out of the box
- new technology** – install only 1 dimmer on a 3- or 4-way circuit without replacing other switches
- easy to order** – complete system in one package

Builder Benefits:

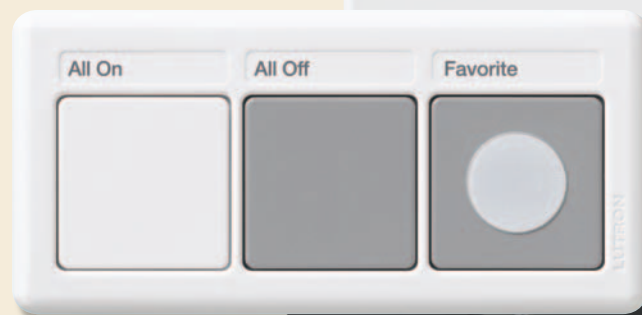

- differentiates** – standardize, gain the competitive edge
- cost effective** – small investment, increases home's value
- simple installation** – pre-programmed, installs like 5 switches
- reliable RF technology** – over a decade of proven success

Homeowner Benefits:

- enhances safety** – light a path from the car into the home
- saves energy** – dimming 50% saves 40% on electricity
- easy to use** – press a button, control 5 areas of light

Master Control

Wireless Controller

AuroRa® – home lighting control made simple.

System includes:

- (5) wall dimmers
- (1) master control
- (1) wireless controller
- (1) central antenna

AuroRa package includes:

Wireless Controller (1)
Place on the car visor, mount on a wall or carry it with you. 3 buttons control your lights: “All On” turns system lights on to full bright – “All Off” turns system lights off – “Favorite” button turns all 5 dimmers on to their locally set light levels.

Dimmers (5)
Install like a switch in 5 key areas of the home. Adjust light levels with the slider – turn on and off by pressing the button. 600W Incandescent loads.

Master Control (1)
Plug into a standard wall outlet and place on a table or countertop. Press a room button to turn dimmer on to locally set slider level. Press “All On” to turn system lights on to full bright or “All Off” turns lights off.

Central Antenna (1)
Plug into a standard wall outlet and place in a central location (can be under a couch). Central antenna ensures reliable radio frequency communication between all system devices.
